VELUX Touch

3 Year Guarantee

VELUX Touch is our new in-room control that allows homeowners to operate multiple products (VELUX roof windows, blinds, and shutters) from one switch. VELUX Touch allows for easy and fast adjusting of the amount of daylight and fresh air at home. It features a 15-minute ventilator timer and a lock-home option. It runs without Wi-Fi, so it is the perfect control option for homeowners that are not interested in controlling their products via apps or sensors.

- Simple control of all your VELUX electric products at your fingertips.
- With the 15 minute ventilation timer, you can air out your room and not worry about closing the window afterwards - VELUX Touch will do it for you.
- One intuitive remote designed for easy use by anyone.
- Enhance your indoor comfort with a single remote
