VELUX solar glass rooflight CVU

Glazing 20A, double-glazed

10 Year Guarantee

0°-15°

Transform your home by bringing the magic of daylight and fresh air into areas where you never thought possible with the new generation of VELUX glass rooflights. The glass rooflight base unit has a unique design with a slim frame and invisible sash providing maximum daylight and a beautiful design from inside the home. This solar base unit is fully powered by the sun and can be installed in any flat roof home without any need for wiring. The solar base unit comes with 2-layer glazing, but is also available with 3-layer glazing, and has excellent energy performance as well as sound reduction capabilities in case of rain, hail or traffic. It delivers fresh air at the touch of a button and has a pre-installed rain sensor that conveniently closes the window automatically in the event of rain, thus providing full peace of mind. It can even be operated via a smart phone, using the VELUX App Control. A both beautiful and convenient solution for your home.

- Minimal visible rooflight frame contributes to glass-to-edge view to the sky and to letting in maximum daylight.
- Enjoy maximum daylight and a stylish design from inside the home, as blinds or awnings are discretely placed in the rooflight.
- Solar-powered for a wire- and hassle-free installation.
- No sun? No problem! The battery will also charge in cloudy weather
- Integrated rain sensor automatically closes the window in the event of rain.
- The motor is hidden from view in the rooflight frame for a sleek appearance and unobstructed view to the sky.
- Enjoy a healthier indoor climate with VELUX ACTIVE with NETATMO automatic indoor climate control compatibility.
